Education

Oral Roberts University

Bachelor of Music - Comp and Tech

freecodecamp, treehouse

brandnpatterson

Skills

HTML5, CSS3, JavaScript, jQuery, React,
Node, NPM, Gulp, Sass, Ruby, Rails, APIs,
PostgreSQL, Git/Github, Terminal

Products

Idiosync

With Ruby on Rails, I built a REST API that sends and receives data to and from PostgreSQL. It uses CORS to accept and deliver data from React using Axios. Once the data has reached React, it's set as the App's state and is passed to children as props to display the data, in this situation, as pieces of literature in this quarterly literary journal.

Hair Industry Salon

I collaborated with a graphic designer to create the ideal layout for this single page app. In the early stages of development, we decided to optimize the layout for mobile use and planned for easy to reach points of action at the top of the screen on mobile devices. On larger screens, the layout flattens and creates a natural banner at the top of the screen.

Work History

Freelance Web Developer

Lake Jackson, TX 2017 - current

I create websites and single page web applications that run on the browser. I work with clients to present them with the ideal product to fulfill their needs.

Substitute Teacher: BISD

Clute, TX 2016 - current

I manage different teams throughout the day that require my instructions. It is my personal goal to make sure that each individual knows their task and is inspired to create the best product possible.
